Preparation 30

To a solution of benzyl indole-4-carboxylate (1.85 g)
5 and N,N-dimethylaminopyridine (180 mg) in acetonitrile (10 ml) was added portionwise di-tert-butyl dicarbonate (1.61 g), and then the mixture was stirred at ambient temperature for 2 hours and stand overnight. The resulting mixture was concentrated in vacuo and the residue was diluted with ethyl
10 acetate (30 ml). The organic layer was washed successively with 1N hydrochloric acid, saturated sodium bicarbonate aqueous solution and brine. The solution was dried over magnesium sulfate and concentrated in vacuo. The residue was purified by silica gel column chromatography (eluent;
15 n-hexane:ethyl acetate = 10:1) to give benzyl 1-tert-butoxycarbonylindole-4-carboxylate (2.26 g).

Example 3

To a suspension of 3-methyl-3H-benzimidazole-4-carboxylic acid hydrochloride (112 mg) in dichloromethane 3.2 ml) was added oxalyl chloride (79 mg) in an ice water bath under nitrogen and then added 1 drop of N,N-dimethylformamide. After being stirred under the same condition for 2 hours, the reaction mixture was concentrated in vacuo. The residue was added to a solution of 4-amino-3-methoxy-N-

methyl-N-[4-methyl-2-[5-(4-methylpiperazin-1-yl)carbonylpent-1-yloxy]phenyl]benzamide (150 mg) in pyridine (2 ml) under nitrogen at ambient temperature and the mixture was stirred for 2 hours and allowed to stand at same temperature overnight. The reaction mixture was concentrated in vacuo and the residue was dissolved in chloroform. Box I Observations where certain claims were found unsearchable (Continuation of item 1 of first sheet)

This International Search Report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1. ☒ Claims Nos.:
because they relate to subject matter not required to be searched by this Authority, namely:
see FURTHER INFORMATION sheet PCT/ISA/210
2. ☒ Claims Nos.:
because they relate to parts of the International Application that do not comply with the prescribed requirements to such an extent that no meaningful International Search can be carried out, specifically:
see FURTHER INFORMATION sheet PCT/ISA/210
3. ☐ Claims Nos.:
because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).

Box II Observations where unity of invention is lacking (Continuation of item 2 of first sheet)

This International Searching Authority found multiple inventions in this international application, as follows:

1. ☐ As all required additional search fees were timely paid by the applicant, this International Search Report covers all searchable claims.
2. ☐ As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
3. ☐ As only some of the required additional search fees were timely paid by the applicant, this International Search Report covers only those claims for which fees were paid, specifically claims Nos.:
4. ☐ No required additional search fees were timely paid by the applicant. Consequently, this International Search Report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:

Remark on Protest

- ☐ The additional search fees were accompanied by the applicant's protest.
- ☐ No protest accompanied the payment of additional search fees.

FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

Claims Nos.: 1,2,6-10

because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:

Claims 1 and 2 are so broad that for determining the scope of a meaningful International Search due account has been taken of Rule 33.3 PCT; special emphasis was put on the following subject-matter:
The compounds of claims 3-5, the methods of their preparation, pharmaceutical compositions containing them, and their use as medicaments

Remark : Although claim 9 is directed to a method of treatment of the human/animal body , the search has been carried out and based on the alleged effects of the compound/composition.
